Mustafa Ali Saeed – junior Back-end Developer (Laravel)

• moustafaabdella715@gmail.com   • +201025701997   •LinkedIn

Profile

As a software engineer with experience in web development and proficiency in various programming languages and tools, I am seeking a challenging role that allows me to leverage my expertise to create efficient and innovative solutions to real-world problems. I am passionate about learning and continuously improving my skills to keep up with the latest trends in the industry. With excellent communication and problem-solving skills.

Professional Experience

Junior Back-end Developer, Visions-tech.   *full-time* — *May 2024 – Present*

- **Back-End Development:**
  Designed and implemented complete back-end systems for multiple projects, including database setup, API design, and server management.

- **Performance Optimization:**
  Improved server performance and API responsiveness to meet user needs and handle high loads by utilizing caching techniques and query optimization.

- **Feature Development:**
  Developed and integrated new features into the system, such as user management systems, notifications, and complex data processing, enhancing user experience.

- **Collaboration and Teamwork:**
  Collaborated closely with front-end development teams to improve integration between the two interfaces and ensure a seamless user experience.

Web Development Intern, Information Technology Institute (ITI) *(Jan 2023 - Feb 2023)*

- Worked as a web developer intern and gained experience in developing web applications using Laravel framework and MySQL database
- Collaborated with other developers and designers to build and maintain web applications

Projects

Jannatak - Marketplace for Houseplants   -user app   -consultant app   -market app

- Developed a specialized marketplace app for houseplants, incorporating user-generated content and plant care tips.
- Integrated location-based services to match users with nearby plant sellers and service providers.

Matlop - Home Service Ordering System   -client app   -provider app

- Built a dual-application system for clients and service providers to facilitate home service orders.
- Implemented real-time notifications, scheduling, and secure payment processing within the app.

Al-Kashim Contracting App   -web app

- I developed the Al-Kashim Contracting app, which provides comprehensive services in maintenance, cleaning, labor management, and hospitality, with a focus on quality and efficiency. The app aims to create clean, safe, and comfortable work environments, meeting client needs with professionalism.

Haraj App

• Developed a marketplace app for buying and selling contracts and franchises.

• Integrated features for listing, purchasing, and managing contracts, ensuring seamless transactions and secure user interactions.

Mr-Tayer App   -web app

• is an innovative platform designed for managing and delivering orders efficiently. It aims to enhance the experience of both users and businesses by providing flexible and effective solutions for delivery services. The system connects customers with delivery agents seamlessly, allowing users to create, manage, and track their orders in real-time.

•**Backend:** The project is built using the Laravel framework, with MySQL as the database management system.

Roadlineco   -web app

Worked as a Laravel Developer at Roadline Company, one of the largest and most established contracting companies in the Arab world and the Middle East. Contributed to the development and maintenance of the company's website (roadlineco.com), focusing on enhancing user experience and ensuring high performance. During my tenure, I collaborated with a multidisciplinary team to implement advanced technical solutions that support the company's activities in construction, roads, airports, and other infrastructure projects

Tashleh -app
Tashleh is a registered application under the Ministry of Commerce with registration number (1069342432). It serves as a platform for buying and selling used car parts. The app facilitates a seamless process where customers can request specific car parts, and various sellers (scrapyards) can submit their price offers. The customer then selects the most suitable offer based on price and other preferences.

E-commerce Store Developer – ZZoon
Developed and maintained an ideal e-commerce store designed to showcase the unique features and capabilities of our products. The store, accessible at ZZoon, offers an exceptional shopping experience with a user-friendly interface and modern design.

Zouq Home
Worked as a Laravel developer at Zouq Home, a Saudi startup based in Riyadh. Developed and maintained the company's online platforms, focusing on providing innovative technical solutions to support the company's goals and help clients achieve their objectives.

Joker App

Contributed as a Laravel developer for the "Joker App" app, a platform dedicated to live sports streaming, available on the Apple App Store. Played a key role in developing and maintaining the backend infrastructure to ensure seamless live streaming and an exceptional user experience for sports enthusiasts.

Education

Bachelor of Engineering in Systems and Computers, Al-Azhar University, Faculty of Engineering (2019 - 2024)

Skills

- **Back-End Development:** Expertise in
    - Laravel,
    - PHP
    - MySQL
    - API
- **Software Architecture**
    Proficient in MVC and Clean Architecture
- **Dependency Injection:** Skilled in using Laravel Service Providers and Facades for clean, flexible, and scalable code.
- **Tools and Technologies:** Experienced with
    - Laravel Forge, Docker,
    - Composer,
    - GitHub, Bitbucket,
    - Postman,
    - Figma to streamline development and deployment processes.
- **API Integration & Data Management:** Extensive experience with
    - RESTful APIs, both remote and local storage solutions,
    - and database integration (MySQL, Firebase) for seamless data handling.
- **Version Control & Collaboration:** Advanced knowledge in Git, GitHub, and Bitbucket for efficient code management, version control, and team collaboration.
- **Testing & Quality Assurance:** Proficient in PHPUnit, Laravel Dusk, and Tinker for unit testing, functional testing, and debugging to ensure high-quality code.
- **Performance Optimization:** Expertise in query optimization, caching strategies, load balancing, and code refactoring to enhance application performance and scalability.
- Soft Skills: Strong communication, problem-solving abilities, adaptability, and a focus on continuous

learning and professional development, with a proven track record in mentoring and guiding teams.
